

Presenting ISCSP-UTL / CAPP / LabTec CS

The Institute for Social and Political Science, one of the Colleges of the Technical University of Lisbon (UTL), is a school oriented towards research and teaching.

The Institute grants Bachelor's, Master's, PhD and "Agregação" (highest faculty level). The Institute offers seven courses, nine Masters degrees and seven doctoral studies areas, all within the Bologna system, designated 1st, 2nd and 3rd Cycles.

In particular, ISCSP-UTL offers a PhD degree on ePlanning, a joint Program with 4 Public Universities in collaboration with MIT. This Program (www.e-planning.org) is geared towards effective use of new technologies, based on sound social and political sciences, and applied to vital needs of our society, such as in the domains of environment, health and education.

ISCSP hosts several research units, with special reference to CAPP - "Centro de Administração e Políticas Públicas", ranked as "Excellent" by the national evaluation agency (FCT-MCES), and "Instituto do Oriente", ranked as "Very Good".

ISCSP has its own facilities in the 'Polo da Ajuda' Campus of the UTL, Lisbon, with modern classrooms and support equipment. In particular, ISCSP-UTL hosts the first of the "LabTec CS", a Network of Laboratories of Technologies for Society within the ePlanning University Consortium, to support (and be supported by) social and political sciences.

Our Mission is to Value People, with basic and applied research/exchange within the scope of Social and Political Sciences and rendering of services to the community as our main objectives.
